

**REQUEST FOR LANDFILL MAINTENANCE SERVICES
DESCRIPTION / SCOPE OF WORK**

CITY OF FORSYTH OLD BRENT ROAD LANDFILL (CLOSED)

The City of Forsyth is responsible for the Post Closure Care of the Old Brent Road Landfill (Location Map Attached). The Post Closure Care Plan requires that the waste disposal areas and sediment ponds be mowed and kept free of woody vegetation. Access to environmental monitoring points must also be maintained.

The waste disposal areas consist of approximately 36 acres. There are two sediment ponds that occupy approximately 2.5 acres. Each Sediment Pond has an outlet structure.

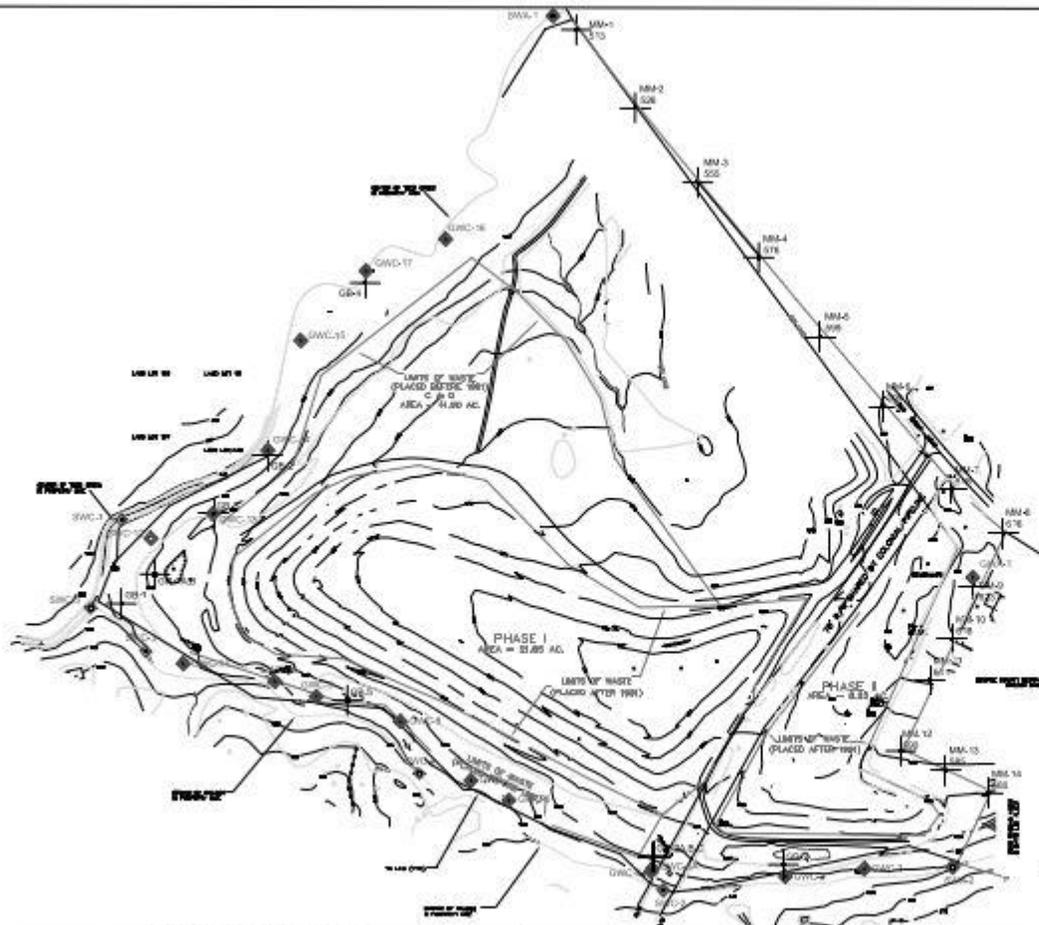

The majority of the waste disposal and sediment pond areas can be mowed with a tractor and bush hog, however, there are berms and ditches on the Phase 1 side that will require hand cutting of woody vegetation and the same is true for the outlet structures of the sediment ponds.

There is a total of 50 Environmental Monitoring Locations around the perimeter: methane, groundwater, and surface water monitoring locations. They are primarily located in wooded areas, but most are accessible by UTV. Each maintenance event needs to include a visit to each location and assuring that paths have not grown up. Leaves and debris needs to be raked from the monitoring well pads, as needed.

The City also requests that if the Contractor notes any issues such as erosion that threatens the soil landfill cover, or leachate outbreaks, that the City be informed so these issues can be addressed.

The City is accepting bids from Contractors to maintain the Old Brent Road Landfill site as per the specifications above. A prebid meeting will be held on Monday, October 5, 2020 at 10:00 am at the Landfill located on Old Brent Road. Responses are due no later than 5:00 pm on Monday, October 12, 2020. Responses may be mailed to City of Forsyth, Janice Hall City Manager, PO Box 1447, Forsyth Ga 30129 or hand delivered to 68 N Lee Street, Forsyth Ga 31029. The City of Forsyth reserves the right to reject any or all bids.
